

spider MINI

RADIO-CONTROLLED SLOPE MOWER FOR EVERYONE

spider MINI introduction

In order to offer Spider mowers even to customers with only an occasional need for their use, we are introducing a new machine named **Spider MINI**.

Spider MINI is the smallest product from the Spider family with a cutting width of 56 cm / 22 inches and a 223 ccm engine. With its climbing ability and manoeuvrability Spider MINI does not lag far behind the commercial models Spider ILD01 and Spider ILD02. The remote control ensures the drive and steering control and enables engine start and emergency shutdown of the machine. The remaining functions, such as the height of cut adjustment and blade engagement are manually controlled directly on the mower. Spider MINI mower is fitted with unique chain portals, which ensure reliable maintenance-free operation, allow to lower the centre of gravity and make the machine generally simpler and cheaper.

The industrial remote control brings ultimate safety for the users, who do not need to enter the slopes and risk their health. The overall weight of the mower is minimized, which has a positive effect on its fuel consumption, emissions as well as gentleness to turf. Spider mowers thus represent the safest and most environmentally friendly method of maintenance of difficult areas.

The mission of our enterprise is a continuous innovative process. Our goal is to seek for gaps in the market and to address customers with new, innovative products, which are not offered by our competitors.

spider MINI application

By introducing the Spider MINI mower the DVORAK - svahove sekacky Ltd. company reacts to frequent customer enquiries for a smaller mower affordable for non-commercial customers. Spider MINI mower will surely find its place on smaller, but difficult areas such as lawns around mountain hotels, photovoltaic power plants, lake dams, farms etc. Traditionally high quality of cut allows the mower to be used even in gardens, parks and other intensively maintained areas.

Spider MINI II can be newly fitted with a mulching kit ensuring an excellent mowing result on fine lawns.

spider MINI III

Technical specification

Drive unit

Engine	Briggs & Stratton 950
Cubic capacity	223 ccm
Fuel tank volume	4 l / 1 gallon
Fuel	unleaded fuel

Traveling system

Transmission	hydrostatic
Speed	0 - 4 kmh / 0 - 2.5 mph
Steering	360° / 4-wheel

Mower deck

Blade	1 rotary
Cutting width	56 cm / 22 inch
Height of cut	4 - 9 cm / 2 - 4 inch
Clutch	manual
Option	Mulching kit

Performance / Consumption

Productivity	up to 1500 m ² /h
Fuel consumption	1 l / 0,25 gallon per hour
Climbing ability	30 degrees / 58 %
Dimensions	1040 x 900 x 600 mm
Weight	125 kg / 270 pounds
